Product Performance

Top & bottom categories and product types

04

Time-of-Day Analysis

Peak selling periods & monthly growth

05

Recommendations & Steps

Strategic actions for the CEO

Business Context

The Business

Bright Coffee Shop runs 3 locations across New York — Lower Manhattan, Hell's Kitchen & Astoria. The portfolio spans beverages, bakery, and branded merchandise.

The CEO Challenge

A newly appointed CEO is tasked with growing revenue and improving product performance. Data-driven insights are needed to guide key decisions.

The Objective

Identify which products generate the most revenue, determine peak trading hours, uncover trends across time, and provide strategic recommendations.

The Dataset

Daily transactions from 3 stores covering 9 product categories and 29 product types — totalling 214K sales and \$699K revenue across Jan–Jun 2026.

Revenue Overview

Product Types

214K

Total Sales

\$699K

Total Revenue

Sales & Revenue Distribution by Store Location

Sales by store location

Revenue by store location

All three locations contribute almost equally (~33% each) to both sales and revenue — a sign of healthy geographic balance.

Product Performance

Revenue by Product Category

Revenue by product category

Revenue by Product Type

Revenue by Product type and category

Top Performers

Coffee (~\$260K) leads by a wide margin, with Tea (~\$195K) a strong second. Together they account for ~65% of total revenue. At product type level, Barista Espresso and Brewed Chai Tea top the chart.

Low Performers

Branded items, Loose Tea, Flavours & Packaged Chocolate each contribute under \$20K. These categories are prime candidates for promotional campaigns or menu rationalisation.

Sales vs Revenue Relationship

✓ Strong positive linear correlation between units sold and revenue generated

💡 High-volume products reliably drive higher revenue — volume is the primary lever

🎯 Products in the lower-left cluster are high in quantity but low in unit price

Time-of-Day & Monthly Trend Analysis

Revenue by Day & Time Slot

Revenue & Sales Trend (Jan – Jun)

 Morning drives the highest revenue across every day of the week

 Revenue grew from ~\$80K in Jan to ~\$160K by Jun — a 2× increase

 Saturday morning is the single highest-revenue time slot overall

Recommendations for the CEO

01 Maximise Coffee & Tea Revenue

Coffee and Tea represent ~65% of revenue. Invest in premium variants, cold brew options and seasonal specials to grow the core.

02 Capitalise on Morning Traffic

Morning is consistently the top slot. Launch AM loyalty stamps, breakfast combos and pre-order options to capture more spend.

03 Revive Under-Performing Products

Branded goods, Flavours & Packaged Chocolate are near zero. Run targeted discounts or replace with higher-margin alternatives.

04 Leverage Equal Location Footprint

All 3 stores contribute ~33% each. Roll out a cross-location loyalty app and use best-store learnings to raise the floor.

05 Automate Reporting & Set Targets

Implement a daily automated dashboard and monthly revenue KPIs per location so the CEO can track progress in real time.

Next Steps

Short Term (0 – 3 months)

- Automate daily sales reporting pipeline
- Launch morning loyalty reward programme
- Run targeted promotions on low-performing categories

Medium Term (3 – 6 months)

- Deploy per-location KPI dashboards
- Expand seasonal Coffee & Tea offerings
- Introduce bundle deals for slow afternoon slots

Long Term (6 – 12 months)

- Data-driven expansion to new locations
- Build customer segmentation from loyalty data
- Integrate real-time inventory management

Thank You
