① Exercise2 — Thulasiram Buttetti
Data Science

① Write a query to find the total number of employees in a company

~~Sele~~ Select count(id) as Total Employees
From brightlearn.databases.exercise_2_data;

Total_employees
10

② Write SQL query to find the total salary paid to all employees in the IT department

Select Sum(salary) as Total_Salary_Paid
From brightlearn.database.exercise 2_data
where department=('IT');

Total_salary_Paid
220000

③ Write a SQL query to calculate the average salary of employees in the HR department

Select Avg(salary) as average_salary_of_employees
From brightlearn.databases.exercise2_data.
where department=('HR');

average_salary_of_employees
49500

② Exercise:2 Thulasizwe Bethel(*2)
Data Science.

④ Write a query to find the highest and lowest salary in the company.

~~Select min(salary)~~ Select max(salary) as Highest_salary,
min(salary) as Lowest_salary
From brightlearn.databases.exercise_2_data;

Highest Salary	Lowest_salary
62000	48000

⑤ Write a SQL query to group employees by department and display total salary paid in each department

Select sum(salary) as Total_Salary_Paid,
departments
From Brightlearn.database.exercise_2_data
group by departments;

Total_Salary Paid	Department
22000	IT
99000	HR
119000	Finance
405000	Marketing

③ Exercise 2

Thullasi Swe
Bootcamp
Data Science

⑥ Write SQL query to count how many employees work in each city

~~Select count(id)~~ Select city,
count(id) as Total Employees
From brightlearn.database.exercise_2_data
group by city;

City	TOTAL Employees
New York	2
Chicago	3
Los Angeles	2
San Francisco	2
Houston	1

⑦ Write a SQL query to group employees by ~~department~~ Department, Calculate average salary in each department and order the results ~~by~~ in descending order of avg salary.

Select department,
avg(salary) as average_salary
From brightlearn.database.exercise_2_data
Order by average_salary desc;

department	average_salary
Finance	59500
IT	55000
Marketing	52500
HR	49500

④ Exercise 2 Foundation Fulcalar Data Science.

⑧ Write a SQL query to find departments where the total salary paid exceed 100000

```
Select departments,
        sum(Salary) as Total Salary_Paid
From brightlearn.databases.exercise_2_data
group by Department
having Total_Salary_Paid >100000;
```

Department	Total Salary_Paid
IT	220000
Finance	119000
Marketing	105000

⑨ Write a SQL query to list cities where more than one employee works, order by the number of employees in descending order.

```
Select city,
        count(id) as Number_of_employees
From brightlearn.databases.exercise_2_data
group by City
having Number_of_employees>1
Order Number_of_employees desc;
```

City	Number of Employees
Chicago	3
New York	2
Los Angeles	2
San Francisco	2

⑩ Write a SQL query to find the department with highest average salary

```
Select department,
        Avg(Salary) as average_salary
From brightlearn.databases_Exercise_2_data
Order by average_salary desc
Limit 1;
```

Department	
Finance	59500
